Super 25

Directions for Use

1. Before feeding SweetPro® Super 25 lick blocks for the first time, animals should be well fed.
2. Provide access for animals to have plenty of clean, fresh water at all times.
3. Have one lick block available per 25 head of beef cows.
4. Provide an adequate source of good quality roughage and forage at all times (all they can consume).
5. Place blocks near water sources or areas cattle frequent regularly.
6. Make blocks available in more than one location in large pastures or where more than one water source is available.
7. If animals run out of lick blocks, repeat from Step#1.
8. Other salt and minerals may be provided free choice to balance specific needs.
9. A two week adaptation period will be required to establish a base consumption rate. After adaptation period, recommended range of intake is 0.34 to 0.56 kgs. per day.
10. Once animals consistently consume more than 0.56 kgs/hd/day, transition to SweetPro Magnum. If daily consumption is consistently below 0.34 kgs/hd/day, transition to SweetPro® FiberMate 20.

The above feeding directions are general guidelines and will vary with the overall feeding conditions. Always use good management practices.

Caution!

Contains 600 mg/kg copper. **DO NOT FEED TO SHEEP!**
Do not use in association with another feed containing supplemental selenium.
