*SweetPro® Mineral EX block is recommended for Beef and Dairy Cattle.  
Cattle should consume an average of 0.2 to 0.8 ounces of SweetPro Mineral EX block per 100 lbs. of animal body weight per day.*

*Intake Expectations:*

*Stockers: 2 to 4 oz/hd/day*

*Cows (on Pasture): 3 to 5 oz/hd/day*

*Cows (on Dry Lot): 4 to 8 oz/hd/day*

### Feeding Instructions:

1. Assure cattle are not starved for nutrients prior to feeding SweetPro Mineral EX block.
2. Have one lick block available per 25 head of cattle.
3. Remove all other self limiting nutritional supplements.
4. Locate SweetPro Mineral EX block where cattle congregate (watering, loafing, shade areas).
5. Replenish SweetPro Mineral EX block on a regular basis as needed.
6. If intake of SweetPro Mineral EX block is below 0.2 to 0.4 ounces per 100 pounds animal body weight per day, increase the number of feeding locations and/or change locations to areas more frequented by cattle.
7. If intake of SweetPro Mineral EX block is above 0.5 to 0.8 ounces per 100 pounds animal body weight per day, reduce the number of feeding locations and/or change locations to areas less frequented by cattle.
8. A two week adaptation period will be required to establish a base consumption rate. After adaptation period, consumption rates will average 2 to 4 ounces per head, per day on Stockers, 3 to 5 ounces / head / day for Cows on Pasture, and 4 to 6 ounces / head / day for Cows on Dry Lot.

### CAUTION: USE AS DIRECTED

Contains 2,100 ppm copper. **DO NOT FEED TO SHEEP!**

Do not use in association with another feed containing supplemental selenium.
