### Sheep Block 1

*SweetPro® Sheep Block 1 is designed for essential fortification of sheep requirements for vitamins A, D & E, plus protein, calcium, phosphorus and trace elements including selenium. Daily intake will vary depending on forage quality and nutritional needs. Recommended consumption is from 0.25 to .30 pounds per head per day.*

### Feeding Instructions:

1. Before feeding SweetPro® Sheep Block 1 for the first time, animals should be well fed.
2. Have one lick block available for each 50 head of sheep.
3. Provide access to plenty of clean, fresh water at all times.
4. Provide an adequate source of good quality roughage and forage at all times (all they can consume).
5. Place lick blocks near water sources or areas sheep frequent regularly.
6. Make lick blocks available in more than one location in large pastures or where more than one water source is available.
7. Other salt and minerals may be provided free choice to balance specific needs.
9. A two week adaptation period will be required to establish a base consumption rate. After adaptation period, recommended range of intake is .25 to .30 lbs. per day.

The above feeding directions are general guidelines and will vary with the overall feeding conditions. Always use good management practices.

### CAUTION: USE AS DIRECTED

Do not use in association with another feed containing supplemental selenium.
