

EQUILIX[®]

VITAMIN, MINERAL & DIGESTIVE AID

Feeding Directions:

1. Before Feeding EquiLix for the first time, animals should be well fed and have access to plenty of fresh water.
2. Have one lick block available for every five to ten head of horses.
3. Provide an adequate source of good quality forage at all times (all they can eat).
4. Place lick blocks in stalls or in pastures where horses loaf.
5. Make lick blocks available in more than one location in large pastures or where more than one water source is available.
6. If animals run out of lick blocks, repeat from Step #1.
7. Other salt and minerals may be provided free choice to balance specific rations.
8. A two week adaptation period will be required to establish a base consumption rate.
9. The above feeding directions are general guidelines and will vary with the overall feeding conditions.

Always use good management practices and adapt to your specific requirements.
